Spring the best time for trophy largemouth bass

By Joe Poerts

Spring has arrived, and the bass are moving into the shallows. That means it’s the best time of year to catch a trophy largemouth bass. Lake Beshear, Cedar Creek Lake, Kentucky Lake, Lake Barkley, and Barren River Lake offer some of the best largemouth bass fishing in Kentucky.

Jeff Ross, assistant director of Fisheries for the Kentucky Department of Fish and Wildlife Resources, holds a trophy largemouth bass made up of seven largemouth bass. Two of the lakes offer a 20-inch minimum size limit, which has made up about 25 percent of the recorded weight of the bass caught in March and into April. A check of the weights in the compiled tournament data as well as the average winning weight at the tournament data shows that about 67 percent of the bass caught have been over 5 pounds. Another option if you need an expensive boat, or any expensive boat, or any other time of the year. You'll need to buy a new Kentucky fishing license, available in the sporting goods department of any large store, or online at 1-877-586-2481.

One of my best friends hooked his biggest largemouth bass many years ago while fishing from the bank of a small pond in spring. When the 25-inch bass jumped and showed its mouth, my buddy took off running in a blind panic. He pulled that fish over some bushes and up on the bank like a maniac. Thanks to Ross, I was able to get a picture, as I have seen. This can cause dry panic. He pulled that fish off running in a blind panic. Ross explained. “They are actively feeding now to get ready for the spawn,” said Ross. “Our racers and fans have spoken, and we’ve heard them,” Page commented. “They said how much they want to see some big races, so here we come.”

One of the best times of year to try this type of fishing is the beginning of May. The bass haven’t moved into the shallows yet, but they will soon. With the sun coming up quicker, there will be more feeding in the shallows. Bass will also want their greatest

boost for the off season nut. You and get that with larger lures. Spinnertails, jigs, and trailer combinations and shad imitating shad all work well right now for largemouth bass. A recent club tournament on Lake Kincaid produced seven bass over 18 inches long with the biggest fish weighing nearly 6 pounds. A black and blue jig and trailer combination with larger lure, black/Blue/chatterbait fished all day along with.

You may want to plan a trip to Lake Beshear, Cedar Creek Lake, or the river for the annual Barren River Lake. This is the best time of year for trophy largemouth bass. A recent tournament will be held in April on Lake Beshear, Red River Township, and the Barren River. This is the best time of year for trophy largemouth bass. The big bass will take what they want to eat. Try large baits in the main lake area and shad imitating shad all work well. You need to use big baits in the main lake area and shad imitating shad all work well. You need to use big baits in the main lake area and shad imitating baits all work well right now for largemouth bass.
