Thursday Jan 6. 33

A sweet spring day. Sun went down in clouds. Working on my S.S. lesson. At 10 a.m. met 8 gentlemen who came down from Tues. to help us get ready for a County organization at 16" to reverse the Refusal of funds - by memorial of Rep. & Senators in Congress & our own local legislators - we had 20 or more & got into good shape. Dr. Bryon as Chair. Dr. Esch was very efficient - the meetings are crystallizing & definitely very strongly. Buck will need to look out George Miller has promised to stand with us. Haven't heard from Hightower yet - meetings of this kind are being held in every County & I am shut off because I can't hear. But I go - May want with the thoughts & meridians this afternoon - Harry got a load of coal this afternoon. He has used coal very freely - The indications for showers but not much change in temperature. Greatly disturbed by an article from Dr. Dellond, Revising the Layman's Review of J. M. He says it is one of the greatest books written. Speaks approvingly of it - But says Sen. Baf. will not hear it. Get this had better!! It disturbs me no little. Murmuring has been coming here & yonder from the S.S. But I have always stood for him. But that Book is an abomination to me & it cuts the sinews of J. M. - Alas alas!
