DIVISION OF WATER
FRANKFORT, KENTUCKY 40601
TELEPHONE (502) 564-3410

November 1, 1973

Wheelwright Sewer Plant
Wheelwright, Kentucky 41669

Dear Sir:

Enclosed are the revised monthly operating report forms necessary for the sewage treatment plant, or plants, under your jurisdiction. Since we now maintain district offices your monthly report will be submitted to:

Kentucky Department for Natural Resources
and Environmental Protection
Division of Water
P. O. Box 954
Harlan, Kentucky 40381

It is urged that the report reach the district office not later than the 10th day of the month so that our field personnel can promptly review them and come to your aid where the need is indicated.

The manner and frequency of samplings and the various tests to be conducted will, at the present, be governed by your laboratory facilities and flow measurement capability.

Monitoring requirements for plant effluents and receiving streams will require considerably more sampling and testing output than has been performed in the past by most cities.
