REGISTRATION

FALL TERM WILL OPEN SEPTEMBER 16

THE KENTUCKY KERNEL

UNIVERSITY OF KENTUCKY

STUDENTS

THE KERNEL BIDS YOU ADIEU UNTIL FALL.

VOLUME XIX

LEXINGTON, KY., AUGUST 23, 1929

NUMBER 41

A. VANDENBOSCH WILL LEAVE ON WORLD CRUISE

Political Science Professor to Sail from Canada Tuesday on Year's Tour

GOES UNDER AUSPICES OF RESEARCH COUNCIL

Will Study in England, Asia; Returns to University Next Fall

Dr. Amry Vandebosch, professor of political science at the University, will begin a world's tour and a year's study under the auspices of the Social Science Research Council of New York when he sails from Quebec, Canada, Tuesday at noon, for Cherbourg, France. His travels will take him down the picturesque Rhine, through foggy London, and into the mysterious East, where he will visit such places as Bombay and romantic Singapore. His studies will be embodied in a treatise which he will probably write after returning to the University one year from this fall.

While at the Hague and the University of Leyden he will make a study of the Dutch Colonial Schools, which train the officials for colonial administration. Here he will meet Prof. C. VanVollenhaven, who is an authority on Mohammedan Law, which prevails in the Dutch Colonial Empire. At Geneva he will examine the reports of the investigation of colonial problems. At London Dr. Vandebosch will study the methods of the British Colonial Schools in teaching colonial administration and government.

Shortly after New Year's day Dr. Vandebosch will leave Marseilles for Bombay, India. For five or six months he will travel in the east, investigating and examining the land, labor and economic policies, governmental machinery, self-government, sanitation, national defense policy and the Nativist movement for independence.

His travels in the East will take him through a great part of India, Ceylon, Sumatra, Java, Celebes islands and probably Borneo. From these he will journey to the Philippine islands, Japan and China, and from thence home.

Mrs. Vandebosch, who has been in Chicago this summer visiting her family, will accompany Dr. Vandebosch on his tour.

President Hoovers' Picture Is Received

The College of Engineering has attained another mark of distinction by being the recipient of an autograph portrait of Herbert Hoover, first engineer to ascend to the presidency of the United States since the days of Washington and Jefferson. The picture has been hung in a prominent place in Dickerson hall as an inspiration to the University students.

It is inscribed in the President's hand writing, "To the College of Engineering, University of Kentucky, with the good wishes of Herbert Hoover."

STUDENTS IN EAST

Miss Verna Law is in New York City this summer doing secretarial work for the editor of the Travel section of the American magazine. Miss Mildred Shute, who is with her, is studying at an art institute there. Both plan to return to the University in time for the fall semester.

Two Chicago Universities Will Give Study in Crime Prevention

According to an article by Oliver Sherwood, criminals plying their trade in Chicago this fall are due to bump against something new in detective work, as both the University of Chicago and Northwestern University are preparing to show what science can do when directed toward crime. The city will serve as the laboratory and classes will be most interesting to the modern sleuths of the collegiate world.

Mr. Sherwood says: "In each instance scientific specialists are available to give the most modern touch to the research work at the University of Chicago. Chief Augustus Vollmer, of Berkeley, Calif.—long noted as the country's most scientific policeman—will be on hand October 1 to head the crime research department there.

At Northwestern University, Maj. Calvin Goddard, ballistics expert of renown, is to take charge of the new research department, to operate under a \$300,000 endowment provided by Chicago business men. He now is in Europe studying the more scientific methods of police in London, Berlin and Paris.

These developments, linking police work to the facilities of higher education, were inspired by the St. Valentine's Day massacre here of seven Moran gangsters. The utility of ordinary police methods in seeking slayers in crimes of this type led to the engagement of Major Goddard in the hope that a study of the guns and bullets used in the killing might lead to identification

200-POUND TACKLE TO RETURN

"PETE" DRURY

"Pete" Drury, 200-pound tackle, will be the main cog around whom Coach Harry Gamage hopes to build an offensive and defensive line this fall, as great as the forward wall which represented the University last year.

Drury is a senior, and completes his football career this fall. He, together with Claire Dees, captain of last year's Wildcat eleven, was given

Farm Women Attend Homemakers' Camps

Vacation Project Is Under Direction of U. K. Extension Department

Three hundred farm women enjoyed a series of district and homemakers' camps in Kentucky this summer, which were under the direction of the University home economics extension department.

The objects of the camps were to give homemakers a short vacation at small expense, and at the same time to give them rest, recreation and relaxation, and to foster a friendly interest between the counties, according to Miss Myrtle Waldon, director of home economics extension work.

The Fayette county Homemakers' Club camped at Clifton with an attendance of 40 members, and there were also camps at the Experiment Substation at Quicksand, Mayfield, Camp Kavanaugh in Jefferson county, and Owensboro.

ROTHENBURG IS REAPPOINTED

Clarence Rothenburg, a University student, will be reappointed as a life saving examiner, according to D. Melville Carr, of Washington, D. C., who conducted a three day Red Cross course in life saving at Joyland Park swimming pool this week.

Summer Session Ends Tomorrow

Final Examinations Will Be Held Today and Saturday; School Will Reopen With Freshman Week.

The 1929 Summer Session, under the direction of Dean W. S. Taylor, of the College of Education, will come to a successful close Saturday. Final examinations will be held in all classes today and tomorrow.

Previous registration records have been broken both semesters, 1,400 students having attended the first term, and 710 the second term. Practically all of the regular classes were offered during the summer and have been well attended.

Until September 12, when Freshman Week will start, the University will be closed, and many repairs, painting, sodding and improvements will be made by the buildings and grounds department, under the supervision of Maury Crutcher. First year students are asked to report at Memorial hall the morning of September 12, and there they will be divided into groups of 30, classified first into boys' and girls' sections, and subdivided into college sections. Dormitories, including the two new halls for men, will open for occupancy at that time.

The regular term will begin September 16 and 17, when registration for upper classes opens. Class work starts Wednesday, September 18.

U. K. FOOTBALL PROSPECTS LOOK GOOD TO GAMAGE

Wildcats Must Overcome too Confident Attitude Toward Centre, Says Coach

ALABAMA, TENNESSEE ON FALL SCHEDULE

Practice Begins September 9; First Game to Be Played on October 5

As summer school draws to a close, we, or at least those of us who will return to the University this fall, begin to turn our thoughts and undivided attention to the coming football season. We wonder if the old boys will get off to a good start and hold it throughout the season. We wonder if they will be there with the "old fight" as in previous years. We even wonder if Harry Gamage, coach of the University team, will be as gloomy as in days of yore.

Just at present Gamage is inclined, to chuckle a little when someone asks him about the Wildcat's chances for a progressive season. He tries to hold back the smile, but somehow he just can't do it. This sudden change in his usual gloomy look gives us a rather optimistic view into the season. We are inclined to believe that the old monarch of the gridiron will have a real treat in store for us when the season opens October 5. Somehow we feel that the edge he will put on the boys their first few weeks of practice will sting our worthy opponents all fall.

When questioned about what he thought would be the hardest battle of the season, Gamage was inclined to think that it would be the contest with Centre. He said it was not so much Centre's football skill that worried him, although that should have a wonderful development under Kubale. His whole worry came because of the psychological phase of the game. He said before the "Cats" walloped the Colonels in 1927 by the amazing score of 33 to 0 they were half beaten before they reached the field where the Colonels were waiting to tear into them.

Now, however, the tide has changed to the very opposite extreme, and the Wildcats are running over with confidence. They think that all this "necessary" is to step out on the field and make a few spectacular passes and Centre will take to a run like a sheep-killing dog. No doubt this attitude came near bringing defeat last year.

Centre undoubtedly will put up a desperate fight against the "Cats," since they have nothing to lose and everything to gain. This will be a great inspiration, but unless Kentucky goes into a complete trance victory should be ours.

It may be interesting to note that Alabama and Tennessee, two outstanding teams of the South and who both have expectations of winning the Southern Conference championship, appear on the Wildcat schedule this season. These matches should be extremely interesting ones. The psychology the "Cats" have gotten against Centre may be true of these teams, especially Alabama, and over confidence of another victory by them may be fatal, as the "Cats" will be strong on courage and determination.

Gamage talks very little about any of the contests, but he emphasizes the fact that the boys will be sent into the games with a determination to keep the score on top. Practice this fall begins a week later than most elevens in the state. The official date is September 9. Gamage gives two reasons for the late beginning; first, that the weather is not so hot a little later, and second, the first game is not played until the Maryville tilt, October 5, and he is afraid the players might become stale with practice before then.

There will be several outstanding features in the schedule this fall. Two night games will be played, the first night football ever played at the University. Twenty huge spotlights will illuminate the field for the games with Maryville and Carson-Newman. This change should be a treat for Lexington fans.

Another important feature is that five of the eight games will be played in Lexington, including the Kentucky-Washington and Lee classic, and the Homecoming game with Tennessee, in which the fight for the old beer keg will be an outstanding event.

LAST ISSUE OF KERNEL

With this issue of the Kentucky Kernel, journalistic activities will be suspended until the fall term opens. As always the Kernel will be issued on Friday mornings, free to students, throughout the ensuing semesters. As the winter staff is much larger in size than during the summer school, journalistic students interested in the work are urged to try out for positions on the paper. The Kernel takes this opportunity to wish all Summer Session students adieu, and to express the hope that many of you will return to school in September.

STAR PLAYER ON U. K. TEAM

"FLOPPY" FORQUER

"Guard 'em Floppy!" And we want to state right here that this former Newcastle high school athlete is a real guard as the record made by the University football team last fall will testify. Forquer will be a junior at the University

this fall and we predict a brilliant career for him in the next two years. He weighs 200 pounds. He is working on his father's farm at Newcastle this summer in preparation for fall practice.

ANNOUNCE NEW RADIO PROGRAM

Prof. E. Z. Palmer, of Economics Department Is Feature of Week; On Air at Mid-day.

A discussion of "Speculation and the Reserve Policy," by Prof. E. Z. Palmer, professor of economics, will feature the University radio program the week of August 29, when Professor Palmer will radiocast during the 15-minute period from 12:30 to 12:45 o'clock mid-day. Dean F. Paul Anderson, of the College of Engineering, will speak over the University remote control studio in connection with station WHAS at Louisville, on Tuesday, August 27. Other features for the week are:

Monday, August 26, 12:30 to 12:45 p. m.—(a) "Shall We Grow Wheat in Kentucky?" by Prof. E. J. Kinney. (b) "Harvesting Korean Lespedeza," by Prof. Ralph Kinney, College of Agriculture.

Tuesday, August 27, 12:30 to 12:45 p. m.—"Engineering Needs Men," by Dean F. Paul Anderson, College of Engineering.

Wednesday, August 28 — (a) "Sheep Talk," by Prof. R. C. Miller. (b) "Feeding Bee Cattle on Pasture," by Prof. Wayland Rhoads, College of Agriculture.

Wednesday night, 9:00 to 10:00 p. m.—University Salon Orchestra.

Thursday, August 29, 12:30 to 12:45 p. m.—"Current Events," by Prof. E. Z. Palmer, College of Commerce.

Friday, August 30, 12:30 to 12:45 p. m.—"What Farm Folks Are Asking," by Prof. N. R. Elliott, College of Agriculture.

WEBB WILL GO TO LOGAN COUNTY

Will Leave Saturday to Join Dr. W. D. Funkhouser in Further Excavation of Indian Mounds.

Prof. William S. Webb will leave tomorrow for Logan county where he will join Dr. W. D. Funkhouser, who is excavating in search of signs of ancient life in the Indian mounds near Lewisburg. Professor Webb has been anxious to start on this interesting work for some weeks, but he could not leave the University until the second term of Summer School was ended.

Dr. Funkhouser has sent photographic plates to Professor Webb for development and they show a part of the wealth of valuable artifacts which have been discovered.

Prof. Webb visited the site before Dr. Funkhouser left on the expedition, and plotted the mounds to be excavated. Professor Webb said that this cache is only a small part of the many signs of ancient life hidden in the state, much of which will be explored and excavated in the near future by the University archeologists.

Walter F. Craddock Is in Auto Accident

Car Leaves Road and Crashes on Rocks 350 Feet Below

Walter F. Craddock, who formerly attended the University, narrowly escaped death last week when his automobile shot over the edge of the road and down a precipice near Natchez, Miss., a letter to his mother, Mrs. Calvin Craddock, discloses. Mr. Craddock leaped from the car just in time to catch himself on the edge of the cliff, while his auto plunged over.

The letter explained that the accelerator became fastened in some manner and the car left the road and fell on the rocks 350 feet below. The machine, which was new, is a complete loss.

Mr. Craddock is state secretary for the national Red Cross, and was en route to Natchez on business when the accident occurred. He visited his parents in Lexington in June, and also attended the Phi Kappa Alpha camp at Clifton at the close of school.

TRAVELING ABROAD

Miss Anne Worthington Callihan, of the University Art Centre, and Miss Virginia McVey, daughter of President Frank L. McVey, have had a pleasant summer traveling and studying in Europe. When word was last received from them they were in Paris, France, and expected to spend ten days sightseeing and sketching in Brittany before sailing for home.

FOWLER IN NEW YORK

Frank Fowler, professor of dramatic production at the University, and director of the Guignol theater, is spending the summer in New York City.

Popularity of Football in the South Is Guaged by Its Stadia

NEW ORLEANS.—Dr. Wilbur C. Smith, athletic director at Tulane University, believes the growth of football in the South can best be gauged by the ever-increasing amount of stadia building.

Of the 23 institutions in the Southern Conference, 12 of the number already have constructed fine football plants or have granted building contracts for such structures, he points out.

Before the war, not a college in the South was prepared to seat more than ten or twelve thousand fans and only three or four could handle crowds of that size. Today, eight or ten can seat crowds of 30,000 while several others can handle crowds of 20,000 or upwards.

Georgia Tech has had more than 42,000 paid admissions at Grant Field. Tulane University has normal seating capacity of 28,000. Virginia's stadium seats 15,000. Kenan memorial stadium at Chapel Hill has a capacity of 30,000. Eight miles away, Duke University, first year in the conference, is dedicating a stadium to seat 33,000.

The University of Georgia playing Yale in October dedicates a new stadium to seat 35,000. Florida has made steps toward building a half million dollar plant. Alabama has authorized a plant to seat 12,000 when the first unit is completed.

PHI KAPPA TAU HOLDS NATIONAL YEARLY MEETING

Social Fraternity Convention Is Attended by 200 Delegates From 40 Chapters

PROGRAM INCLUDES DANCE AND BANQUET

University, Transylvania and Centre Chapters Are Hosts; Session Closes Tomorrow

Representatives from 40 chapters of Phi Kappa Tau, social fraternity, opened their annual national convention at the Phoenix hotel yesterday morning with approximately 200 delegates in attendance. The session will last three days, closing Saturday night with a banquet at the hotel.

Domain chiefs and grand councilors have been in Lexington since Monday preparing for the convention, which is the second held in the Blue Grass in recent years, as local chapters at Transylvania and the University were also hosts to the national fraternity in 1923. This year Kappa chapter of the University, Theta chapter of Transylvania, and Delta chapter of Centre College are acting as hosts. The entertaining committee is composed of John Y. Brown, chairman; Beecher Adams, of Kappa chapter; Bruce Morford, of Theta chapter; and Mason Knuckles, of Delta chapter.

The first session was held Thursday morning at the Phoenix hotel, and Mayor James J. O'Brien, of Lexington was introduced to the delegates by John Y. Brown. Mayor O'Brien gave a short welcoming speech to members of the fraternity, following which past and present grand officers were introduced. Another session was held yesterday afternoon at 3 o'clock, and business matters were discussed.

From 4 to 6 o'clock yesterday afternoon a sightseeing tour was enjoyed, and adjacent historic spots in the Blue Grass were visited. Last night delegates were entertained with a stag smoker at the hotel, with a theater party for delegates, wives and friends following.

The program for today includes: 10 a. m.—Third session. 1:30 p. m.—Luncheon bridge for ladies. 2 p. m.—Fourth session. 9 p. m.—Phi Kappa Tau convention dance in ball room.

Saturday 10 a. m.—Final session, with election of officers and selection of convention city for 1930. 1 p. m.—Blue Grass Fair and races. 6:30 p. m.—Phi Kappa Tau banquet at hotel.

Results of 3-Year Farm Study Given

Bulletin No. 289, published by the University Experiment Station, carries the results of a three-year study of farm conditions in the Purchase region of Kentucky.

The work was conducted cooperatively by the farm economics department of the station and the bureau of agricultural economics of the United States Department of Agriculture. Stud methods of successful farmers were studied. The bulletin points out the fact that tobacco raising is slightly in the decline in that region, and more attention is being given to the production of poultry and fruit.

Popularity of Football in the South Is Guaged by Its Stadia

Fifteen years ago, Georgia Tech was drawing 4,000 fans and Tulane considered it a great throng when two or three thousand came to a contest. Up until two years ago the city of Birmingham was turning out in "great numbers" when 7,000 saw Alabama and Sewanee play there. In 1927, 25,000 saw Georgia and Alabama play in the city's new municipal stadium and the same season 18,000 saw Howard and Birmingham Southern, city colleges, fight it out for the Birmingham championship.

The University of Florida has found Jacksonville ready to come out 15,000 strong any day the Alligators play there. Eight thousand saw Auburn and Birmingham Southern in a certain raising game at Montgomery last year.

Dr. Smith believes the future of football is even greater with additional thousands of fans being converted to the love of the sport every year.

Mississippi University and Mississippi A. and M. only in recent years have started a home and home arrangement for their games, alternating between Starkville and Oxford. Attendance figures for their games have jumped tremendously under this campus arrangement. Dr. Smith points out, with 12,000 or more seeing the games now annually and the figures swelling every Thanksgiving.

Clemson and South Carolina played to 15,000 at Columbia, S. C., last fall and the only reason 25,000 were not at the game was because of a sell-out long before game time.
