R. W. McILVAINE CO.

1156 MONADNOCK BLOCK

CHICAGO, ILL. May 2 1919.

Wisconsin Steel Co.,

Benham Ky.

Attention Mr. Horn.

Gentlemen:-

We are mailing you under separate cover drawings #530, 532, 533, 544, and 546, covering revisions in the takeup which we have changed to a tension carriage as per your request.

You will note that the tension carriage is somewhat different from your sketch and that we have furnished in addition to what you called for, a structural steel frame to carry foot shaft and counterweight in such a way that there will be no danger of cramping.

The drawings #530, 532, and 533 are the same as previously furnished you except the wood supports are changed slightly to accomodate the changed conditions. The tension carriage is drawn in position.

Hoping this will meet with your requirements, we beg to remain,

Yours truly,

R.W.McIlvaine Co.,
